PROJECTS

Job Portal:

- The project is for providing non-technical jobs to job seekers. It has 3 types of users 1- Admin, 2-Job Seeker, and 3- Job Provider. Where the admin has control over information about both the Job Seeker and Provider. The Job Provider can post a job with the necessary details and the seeker can browse different jobs and apply for them
- This project is developed by a team of 3 in 6 months.
- Php(Backend) and HTML, CSS, JavaScript(frontend) with MySQL database.
- Future Prospects in the project: Authentication of both the job seeker and the provider by government documents.

Finance Manager:

- The finance management project aims to help users track and manage their personal finances. Users can log in, add income and expense transactions, view their financial summary, and generate reports.
- React.js is used as Frontend
- Express.js, Node.js used as Backend
- MongoDB for DataBase
